

Thu Nov. 7

- Data Model. (Is agenda necessary? Should we just create it in front-end?)
 - Separate data models for MVP and the whole thing
- MVP
 - Create Pin Point, add time, location to it.
 - agenda events
 - Possible to cut down the map for the MVP; e.g. use form input for entering a location/detail entry set
 - Discuss about end of term availability to determine if we should frontload the work to the MVP
- Protocol Design to update the user [show?] page
 - JSON including location data/user data
 - Push/pull
- Context Diagram
 - Users, Application, APIs, Other backend processors
 - No need to put events in as blocks
- Security issues
 - How to restrict access to agendas: privacy settings for agendas/groups
 - Who can see/edit/delete what
 - User validation
- How to implement map
 -
