Nov. 14, 2013

- Moderator in a Cabal?
- Bring User to a decision?
- Clarification on MVP(How to add a pinpoint without map)
- security(have to pay $49 for message encryption)
- How to edit a pinpoint? (All users, only the creator?)
- *Is the design doc acceptable in thoroughness, length, etc?*
- *Ideas to make the app as user-friendly as possible.*
  Inspiration: https://set-up.mit.edu/ 's sign-up process
- *Does our MVP have to have Google Maps API Integration?*
  We do not know if we can accomplish this on time and the most basic

representation of a location/activity is just a user describing it (by typing a location name or text address)
